Education

Indian Institute of Technology (BHU) Varanasi

B.Tech in Electrical Engineering

Dec 2021 – May 2025

GPA: 9.59/10

Experience

Software Engineer, Netradyne Technology – Bengaluru

July 2025 – Present

- Designed and shipped configurable video **Data Retention Policy (DRP)** enforcement across the backend platform's core services, covering day-exact/month-rounded expiry, presigned-URL gating, and S3 lifecycle tagging for uploads and derived video artifacts.
- Built banded **S3 bucket** infrastructure (five duration tiers, 62–403 days) with new **partition types**, per-day lifecycle expiry rules, and cross-environment IAM, enabling automatic, cost-controlled video expiry with zero object migration.
- Delivered **GDPR Data Access Levels (DAL)**: a 4-tier, config-driven privacy framework enforcing per-tenant data-access restrictions across backend and device configuration, with validation guards and audit logging.
- Migrated encryption framework from **AWS CMK** to tenant-specific local encryption (**TEK**), refactoring key storage and decryption logic across services to strengthen data security and reduce overall KMS costs.

Decision Analyst Intern, EXL – Gurugram

May 2024 – July 2024

- Created an interactive **competitive price monitoring dashboard** analyzing transaction-level data from 5 retail stores over 2 years (857 products) across Overview, Sales, Price, and Elasticity views.
- Conducted **customer segmentation using RFM profiling** and tracked KPIs like sales growth and retention, enabling strategists to set profitable prices based on elasticities.

Projects

Doc-Link

github.com/Doc-Link

- Developed a **React application** for managing medical appointments, featuring login, registration, and user authentication functionalities using bcrypt.js and MongoDB as database service.
- Designed distinct interfaces for Admin, User, and Doctor, ensuring a customized experience.
- Incorporated push notification capability, streamlined doctor availability checking and appointment booking through doctor approval, and enabled admin to approve or reject doctor registrations

MovieMate

github.com/Movie-Mate

- Created a **Next.js application** to display movie details using the TMDB API.
- Implemented Dark/Light mode and a Disqus React comment section for user engagement.
- Built a **Flask backend** with a TF-IDF vectorization model for personalized movie recommendations.

Skills

Languages: C/C++, Java, JavaScript, SQL

Technologies: AWS (S3, Lambda, EventBridge, KMS, IAM), PostgreSQL, Node.js, Express, React, MongoDB

Areas of Interest: Data Structures, Algorithms, OS, OOPS

Achievements

- Expert** on Codeforces with a maximum rating of **1639**, with active participation in contests. [Profile Link](#)
- Global Rank 946**, Codeforces Round 931, Div 2 — **Global Rank 989**, Codeforces Round 930, Div 2
- 4 star** on CodeChef with a maximum rating of **1853**, with active participation in contests. [Profile Link](#)
- Secured **AIR 3150** in JEE Advanced 2021 and **AIR 2220** with **99.80 percentile** in JEE Mains 2021.

Extra-Curricular

- Hosted **Aptiquiest**, a Quant aptitude test involving number theory, geometry, combinatorics, probability, and puzzles, which gained a footfall of more than **400+** participants.
- Managed **18 teams** and curated creative themes for **Admad**, a campus advertisement-making event.
- Attained prestigious **Shodan (1st Dan) black belt** in Shito-Ryu Karate in 2017.
